Brenda has obtained approximately \$14 million in competitive research funding. She is frequently engaged as a keynote or invited speaker. Brenda has supervised 15 PhD students and three Masters by Research students to successful completion.

Brenda implemented the first known position for a mental health consumer academic at the University of Melbourne, followed by similar positions at Central Queensland University and University of Canberra. She is lead investigator of a National Health and Medical Research Council grant: Improving the cardiometabolic health of people with psychosis: The Physical Health Nurse Consultant service, a nurse-led initiative.

Brenda has received numerous awards including the Victorian Mental Illness Awareness Council (VMIAC) Inaugural lifetime Ally Award in 2018, the Queensland Mental Health Week Mental Health Achievement Award in 2013 and most recently the TheMHS Exceptional Contribution Award at the 2019 Mental Health Service Awards of Australia and New Zealand for her exceptional contribution to mental health.

27TH ANNUAL ORATION

ORATOR: PROFESSOR MIKE HAZELTON

ABOUT THE ORATION

*Evidence, Compassion and Human Rights:
The Right Treatment/The Right to Treatment*

In recent decades organisations such as the United Nations and World Health Organization have called for the adoption of internationally recognised standards of service provision that incorporate human rights principles and practices. At the same time commentators such as Arthur Kleinman have argued that a significant barrier to mental health is moral in that individuals with mental illness exist in poor environmental conditions and governments, as stewards of citizenry, have often failed to protect them.

In Australia, mental health policy and practice have been influenced by ideas such as evidence based practice and recovery focused mental health care and yet we still struggle to provide effective care for people living with mental illness. Professor Hazelton will consider borderline personality disorder as an issue for both evidence based practice and human rights. We can and ought to be doing better in helping people who live with borderline personality disorder. In doing so we are likely to become more effective and compassionate practitioners.
